

RENALYN D. ARGANA

QA / SOFTWARE QUALITY ASSURANCE

Muntinlupa City, Philippines · 0910-167-5719 · renalynargana@gmail.com · renalynargana.github.io/portfolio

PROFILE

Software Quality Assurance professional with hands-on experience in test planning, regression testing, and UAT. I focus on catching problems before users ever see them, and on writing documentation clear enough that any teammate can step in without hand-holding. I work closely with developers and clients to make sure what actually ships matches what was asked for.

WORK EXPERIENCE

Software Quality Assurance Tester

Oct 2022 – Present

Elite Software and Data Security — Manila, Philippines

PROJECTS HANDLED

- **KLine KIDS — Crew Accident/Incident Database System** — Client: K Line (Manning Website)
- **KLine CMS — Crew Management System** — Client: K Line (Seafarer's Profile)
- **KLine Crew Debriefing Form** — Client: K Line (Crew feedback after disembark)
- **KLine Crew Change Plan** — Client: K Line (Embark & disembark scheduling)
- **VERIPRO — Crew Management System** — Crew change (Embark & Disembark) and Crew profile
- **MEMO Circular System** — Vessel database & Document circulation
 - Wrote clear system manuals so new team members could get up to speed without needing someone to walk them through it.
 - Managed the ticketing system, keeping issues tracked and resolved without things slipping through the cracks.
 - Ran regression tests on every update and helped spot ways to make the system run better. Manually tested the website and mobile app from start to finish to make sure everything worked the way it should before going live.
 - Retested fixed bugs and tracked them until resolved, helping the team close out 95% of issues before each release.
 - Helped run monthly regression testing manually going through 400+ scenarios in about a week, to make sure nothing broke after updates.
 - Coordinated UAT with Client/User, making sure what we built actually matched what they asked for before sign-off.

Quality Assurance — On-the-Job Training

Jan – Feb 2022

Highly Succeed Inc. — Mandaluyong, Philippines

PROJECTS HANDLED

- **mWell Mobile Application | Healthcare** — Teleconsultation, e-prescription & patient records
 - Developed test cases based on system requirements and vendor documentation covering teleconsultation, e-prescription, and patient record features
 - Coordinated with the project team to align testing timelines with development sprints and deployment schedules
- **mAgri Mobile Application | Agriculture** — Farm data tracking, crop monitoring & marketplace
 - Created test cases from system requirements documentation to validate farm data tracking, crop monitoring, and marketplace modules
